

## PC TOOLCRIB

### Complete Tool and Inventory Management

Our turnkey inventory and purchasing management software helps you better control volatile expenses and reduce the cost of doing business. Integral purchasing, cost accounting, reporting and tracking tools facilitate the efficient management of MRO items, supplies, storeroom inventories and tool cribs. This scalable solution can be integrated with many existing systems, including our line of SupplyPro Industrial Vending Machines, or it can operate as a stand-alone application.

### Standard Features

- Inventory transactions are linked to job ID, employee, work centre or similar cost sensitive criteria
- Multi-layered security ensures the right personnel are supplied with the right product
- Effective control of durable, perishable and consumable items
- Real time item availability
- Manages regrind, inspection and preset tool support areas
- Creates kits containing an unlimited number of tools, parts, serialized tools and unlimited levels of sub kits
- Handles new and used tools automatically
- Enables grouping of products for faster searches and concise reporting
- Links CAD drawings to tools, kits and serialized tools
- Offers 150 standard reports that can be viewed, e-mailed or printed
- Includes graphs that summarize large amounts of useful data
- Simple import and export utilities use multiple file formats including Excel and ASCII
- Automatic daily backups of crucial data and effective restoration of historic information should an issue occur

### Expanded Capabilities with Add-On Modules

Additional requisition and purchasing tools, bar code functionality and multiple storeroom location modules are available to help improve your business performance.
